

Dear Ms. Saare-Edmonds,

I am writing to state my opinion that the proposed MWELO is too restrictive and does not address the many inefficient projects already existing. As landscape architects, and as world citizens, particularly here in California, we have and will continue to take resource conservation very seriously. However, these conservation methods need to be implemented in a reasonable way and will not be so under the proposed MWELO.

Thank you for your time.

Jennifer Salazar, RLA, ASLA
